

## Samsung Text Template

Many Android users have Samsung phones. Samsung devices allow you to navigate to the “Quick response” icon under the messaging bar, then select pre-written templates. The process of creating quick-response templates for a Samsung device will look something like this:

1. Open your Messages app.
2. Click the three dots in a vertical row above the message.
3. Select “Settings,” “More settings,” then “Quick responses.”
4. Write your message.
5. Avoid using real words as shortcuts. You might want to make up a word to avoid mistyped texts.
6. Press the green plus symbol to the right of your message to save the template.
